The original version of “What Color is Your Parachute?” was created back in 1970. This was during a decade where looking for a job consisted of walking the street looking for help wanted signs and checking out the local classified section of the daily newspaper. I remember looking at an older version in the early 1990s during the last recession. At that time, I was practically fresh out of school and the book proved to be very helpful because it contained information they didn’t teach in class.

For a book that has been around since before I was born, it contains some useful job search information and excellent reference information that is relevant even today. For job seekers (like me almost two decades ago) who have never actively had to look for a position, or for someone who has been out of job search mode for years, this book would be a good tool.

However, for a job seeker who is looking for more specific information, such as how to write a resume that will land you an interview; I would strongly recommend reviewing other resources.
